

Project Title

TCX3901 Industrial Practice — Presentation 1

Member One (A0000001V)

Member Two (A0000002W)

Member Three (A0000003X)

Member Four (A0000004Y)

Member Five (A0000005Z)

Supervisor: Dr. Han Liang Wee, Eric

Bachelor of Information Technology Programme

National University of Singapore

AY2026/27

Repository: <https://github.com/your-group/your-repo> (replace and add supervisor to repo)

Outline

Introduction

Objectives and Scope

Approach

Progress

Project Plan

Introduction

- *Background and context of the project.*
- *The problem it addresses. Example citation (Lamport, 1978).*

Existing Solutions

- *The closest existing systems or related work, with citations.*
- *How each works, and why it is still insufficient.*

Motivation

- *The gap or need the project responds to.*
- *Who benefits from its outcome.*

Objectives and Scope

Objective

The overall objective in one or two sentences: we aim to build ... such that ...

Scope

What the project covers and where its limits are; assumptions and constraints.

Requirements

- *Key user stories, each with testable conditions of satisfaction.*
- *Keep to the most important few; the full backlog is in the report.*

Approach

- *How the work is carried out: the development process and what each iteration delivers.*
- *The technologies used.*

Architecture

- *The components of the system, what each is responsible for and how they interact.*
- *A diagram works better than text here: `\includegraphics from images/`.*

Design Decisions

- *Key decisions about the system: the choice made and the alternatives considered.*
- *The reason for each choice.*

Progress to Date

- *Work completed since the proposal.*
- *Early prototype, demo or findings.*

Project Plan

Iteration	Period	User Stories and Outcome	Deliverable
0	Sem 1, Weeks 1–5	<i>Requirements, architecture</i>	Report 1
1	Sem 1, Weeks 6–8	US1, US2: core story end to end	Presentation 1
2	Sem 1, Weeks 9–13	<i>US3, US4: must-have stories complete</i>	
3	Sem 2, Weeks 1–2	<i>US5, US6: integrated and deployed</i>	Report 2
4	Sem 2, Weeks 3–8	<i>US7: evaluation complete</i>	Report 3
5	Sem 2, Weeks 9–12	<i>Fixes from the evaluation</i>	Presentation 2

- *Where the project is now (highlighted) and what comes next.*
- *Key risks to the plan and how they will be managed.*

Individual Contributions

Member	Role	Contributions
Member One	Team Lead	
Member Two	Backend Developer	
Member Three	Frontend Developer	
Member Four	QA & Testing Lead	
Member Five	DevOps & Documentation	

Not needed for an individual project: set `\individualprojecttrue` in `config.tex` to remove this slide.
