

TCX3901 Industrial Practice

Project Title

(Non-Work-Related Project)

By

Member One (A0000001V)

Member Two (A0000002W)

Member Three (A0000003X)

Member Four (A0000004Y)

Member Five (A0000005Z)

Bachelor of Information Technology Programme

School of Continuing and Lifelong Education (SCALE)

School of Computing (SoC)

National University of Singapore

AY2026/27

Supervisor: Dr. Han Liang Wee, Eric

Deliverables:

Report: 1 Volume

Repository: <https://github.com/your-group/your-repo>

Individual Contributions

State each member's role in the group and their responsibilities (Table 1), then each member's contributions for the period covered by each part. Update this page at every submission.

Member	Role	Responsibilities
Member One	Team Lead	
Member Two	Backend Developer	
Member Three	Frontend Developer	
Member Four	QA & Testing Lead	
Member Five	DevOps & Documentation	

Table 1: Roles and responsibilities

Part I: Proposal State each member's contributions up to the proposal.

Part II: Mid-Term Report To be completed at the mid-term submission.

Part III: Final Report To be completed at the final submission.

I Proposal

This proposal sets out the objectives, approach and plan of work for the assigned project over the two semesters.

1 Introduction

Introduce the project: its background, context and the problem it addresses. Example citation (Lamport, 1978).

Motivation Explain why the project is worth doing: the gap or need it responds to, and who benefits from its outcome.

2 Objectives and Scope

State what the project sets out to achieve and the boundaries within which it will be carried out.

Objectives List the concrete objectives of the project and how their achievement will be judged.

Scope Delimit what is in and out of scope, and state any assumptions and constraints.

Requirements Capture the key requirements as user stories (move to an appendix if too long).

3 Approach

Describe how the group intends to approach the project topic: the methodology, the technologies or techniques being considered, and the rationale for these choices.

Design Decisions Record the key design decisions, the alternatives considered, and the reasons for each choice.

Project Plan Present the plan of work over the two semesters, aligned to the submission deadlines (Table 2).

Period	Planned Work
Sem 1, Weeks 1–5	Proposal (Report 1)
Sem 1, Weeks 6–13	Development; Presentation 1 (Week 8)
Sem 2, Weeks 1–2	Mid-term report (Report 2)
Sem 2, Weeks 3–8	Final report (Report 3)
Sem 2, Weeks 9–12	Presentation 2 (Week 12)

Table 2: Project timeline

II Mid-Term Report

This mid-term report documents progress against the proposed plan, presents interim results, and revises the plan for the remaining work.

4 Progress

Report on the progress of the project since the proposal in Part I, noting any changes to the objectives, scope or approach since then.

Work Completed Describe the work completed to date against the plan in Table 2, including the user stories (Section 2) delivered so far.

Preliminary Results Present interim results, prototypes or findings, and what they indicate about the direction of the project.

5 Challenges

Discuss the difficulties encountered so far and how they were, or will be, mitigated.

Updated Plan Present the revised plan for the remaining work up to the final report (Sem 2, end of Week 8) and Presentation 2 (Sem 2, end of Week 12).

III Final Report

This final report presents the completed project, its evaluation, and the application of knowledge acquired through the programme.

6 Implementation

Describe what was ultimately built and delivered: the final state of the project and how it fulfils the objectives in Part I.

Design Overview Present the final design or architecture, highlighting the key decisions and their trade-offs.

7 Evaluation

Explain how the project outcome was evaluated: the methodology, setup and metrics used.

Results Present and interpret the results, relating them back to the objectives and the user stories (Section 2).

8 Conclusion

Summary Summarize what was achieved, measured against the objectives set out in Part I.

Reflection Reflect on how the concepts and theories from your degree programme were applied in the project, and how they shaped its outcome.

Future Work Suggest extensions or improvements that could follow from this project.
